IDENTIFIERS *Pennsylvania

ABSTRACT

This publication is divided into three sections that provide profiles of the colleges and universities in Pennsylvania, program listings, and information on student aid. The guide is designed to help high school students and their counselors select those programs and institutions of higher education that best match the students' needs, interests, and resources. The institutional profiles present general information, admission procedures, admission requirements, 1975 Scholastic Aptitude Test scores and class rank in fifths, information on financial aid, and a brief description of unique or distinctive features of the college. The program listings are organized according to the taxonomy of the Higher Education General Information Survey, which classifies all degree programs into major areas of study. A profile of student aid for Pennsylvanians through the Pennsylvania Higher Education Assistance Agency (PHEAA) and a list of regional offices of PHEAA are provided. Very brief summaries of the following federal programs are included: Basic Educational Opportunity Grant Program, National Direct Student Loan Program, Supplemental Educational Opportunity Grant Program, and College Work-Study Program. Some Information about Federal Programs		275

FOREWORD

KEYS TO EDUCATIONAL OPPORTUNITY IN PENNSYLVANIA presents information which can help high school students and their counselors select those programs and institutions of higher education which best match the students' needs, interests, and resources. This book will enable you to compare the costs, character, and program offerings of the colleges and universities in Pennsylvania and identify those you consider worthy of further investigation.

Pennsylvania boasts more than 150 accredited colleges and universities well distributed throughout the state. This number includes over 90 independent colleges and universities, fourteen state-owned colleges and university, four state-related universities, fourteen community colleges, and a number of private junior colleges. In addition, over 29 branch colleges and campuses are operated by these institutions in various parts of the state.

Our rich heritage as Pennsylvanians encompasses a breadth and depth of higher education opportunity unsurpassed anywhere in the world. Whatever a person's aspirations and talents, Pennsylvania's institutions of higher education offer many options for personal growth and fulfillment. Your choice of college should be determined by the program, the environment, and the character of the institution first, with exploration of finances following that choice. The importance of your education over the rest of your life is incalculable; therefore, you should explore all the diversity offered in size and values.

The Independent Sector of higher education represents a broad range of institutions in their diversity. They include the smaller value-oriented colleges with varied church affiliations, single-sex colleges, and non-denominational colleges and universities, as well as some of the most prestigious and selective liberal arts colleges in the world. The research and teaching universities with their nationally ranked professional schools are indeed international in scope. Some of them, as well as a number of four-year colleges, actually pre-date our country's Revolution and Civil War.

This heritage of commitment to education characteristic of our nation's history is reflected in the continuing emphasis on quality that is evident in the independent colleges. Although tuition costs may appear high when compared to the public sector institutions, the student should become familiar with the sources of financial aid which are available to reduce this tuition differential. They include the well-known federal basic grant program and a significant state financed grant program, as well as scholarships from endowment income and private gifts.

The fourteen State Colleges and University have experienced considerable growth in size and program offerings in the past decade. Once dedicated to teacher education, these institutions are now multi-purpose institutions prepared to offer a spectrum of programs to meet the needs of the Commonwealth and its citizens.

The thirteen colleges and the university have been placed geographically to provide regional service so that every citizen has an opportunity to get a quality, low-cost, four-year higher education. While located regionally, the colleges draw students from throughout the Commonwealth and from other states and nations.

The public colleges exist to provide programs for our youth desiring a four-year education and to help them go on to the excellent graduate institutions in Pennsylvania.

The fourteen Community Colleges of Pennsylvania offer a wide variety of programs both for transfer of credits earned to four-year colleges and for opportunity of immediate employment. In order to meet students' interests and needs, a variety of liberal arts programs is offered which permits students to transfer to four-year colleges to complete their undergraduate program. The range of occupational programs is especially varied; you can find programs in broadcasting, culinary arts, hotel management, forestry, park management, surveying, and welding, to name only a few. The colleges are located across the state and offer special tuition rates to residents of the area each serves. While these institutions are designed for commuters and have no dormitories, housing arrangements can be made on an individual basis if there is a unique program which meets your need. One of the basic commitments of community colleges is to provide a full range of guidance and counseling services which can prove helpful to you in making those important decisions about your program and your future vocation.

The four State-Related Universities (Pennsylvania State University, Temple University, University of Pittsburgh, and Lincoln University) are characterized by a common commitment to develop human potential in all segments of society, to improve equitable access to educational opportunities for all Pennsylvania citizens, to enlarge through scholarly research the reservoir of knowledge essential for intellectual, social, cultural, and economic progress, to help meet the changing manpower requirements, and to help individuals keep pace with new knowledge and changing skills throughout life. These goals are accomplished through main campuses located in Lincoln, Philadelphia, Pittsburgh, and University Park, supplemented by a network of branch campuses that serve primarily as lower division feeder branches of the parent institutions. A full range of education programs at the graduate and professional levels, as well as baccalaureate programs (with an emphasis on upper division work) and continuing education opportunities are offered at the branch campuses.

Use this book to help zero in on several institutions which merit further investigation. Remember that the detailed data presented in this book change constantly, although the overall relationships among institutions remain relatively constant. You should always make direct contact with institutions of interest to you before making your final decision.

NOTE: Despite the substantial amount of information included, there are some special purpose institutions, such as seminaries, trade, business schools, graduate, and professional schools, which are outside the scope of this book. Students seeking information on the opportunities at these institutions should talk with their guidance counselors.

ACKNOWLEDGEMENTS

We deeply appreciate the assistance of the Pennsylvania colleges and universities who have furnished profile information and program data for this document. Particular gratitude is due to Pennsylvania Higher Education Assistance Agency, (PHEAA), for providing page masters, technical assistance, and financial support during the preparation of this book.

Geographical Distribution of Students: 95% Pennsylvania, 5% other states
Religious Affiliation: None
*resident of sponsor district - \$295; resident of non-sponsor district - \$620;
out of state - \$850

ADMISSION PROCEDURES

Closing Date for Applications: N/A
Early Decision Closing Date: N/A
Application Fee: \$10 non-refundable
Date of Admission Notification: Rolling
Commitment Deposit: \$50 non-refundable
Recommendations: Sometimes Interview: Required for some programs
Admissions Officer: Chester D. Schuman, Director of Admissions and Records

ADMISSION REQUIREMENTS

High school diploma or equivalent. Acceptance into some programs requires high school subjects in geometry, algebra, and one year of science.

FINANCIAL AID

Financial Aid Officer: Grant M. Berry, Jr.
Deadline for Application: May 1 (See appendix for further information)
Percentage of Students Receiving Aid: 65%
ROTC Available: No

DISTINCTIVE OR UNIQUE FEATURES OF THE COLLEGE

Williamsport Area Community College is located in central Pennsylvania and is surrounded by the majestic Allegheny Mountains. The college offers a placement service which, in the past, has placed approximately 85% of our students.

YORK COLLEGE OF PENNSYLVANIA

YORK, PENNSYLVANIA 17405
(717) 846-7788

GENERAL INFORMATION

Number of Students: 1,811* 1,027 Men 784 Women
 Number of Applications (Fall 1976): 1,584 Accepted: 1,258 Enrolled: 717
 Costs Per School Year: Tuition: \$1,750 Room and Board: \$1,266
 Faculty: 79 Full-Time 71 Part-Time** 35 With Doctorate
 Student/Faculty Ratio: 25:1
 Library-Learning Resources: 95,000 Bound Volumes 1,100 Periodicals
 19,000 In Microfilm

Curricular Offerings: (See chart in front of booklet)

Advanced Placement: Yes Advanced Credit: Yes

Degrees Granted: B.A., B.S., A.A., A.S.

Accreditation: Middle States Association of Colleges and Secondary Schools

Housing: Dormitories for men and women. Off-campus housing also available.

Academic Calendar: Semester

Geographical Distribution of Students: 80% Pennsylvania, 20% other states

Religious Affiliation: None

*full-time only (1,811 full-time plus 1,461 part-time equals total of 3,272)

**includes part-time day and evening faculty

ADMISSION PROCEDURES

Closing Date for Applications: Open

Early Decision Closing Date: Rolling admissions

Application Fee: \$15

Date of Admission Notification: Rolling admissions

Commitment Deposit: \$100 for commuters, \$200 for residents

Recommendations: Required

Interview: Recommended

Admissions Officer: Bradley J. Culbertson

ADMISSION REQUIREMENTS

High School Units Recommended: 3 English, 2 social sciences, 2 mathematics,
 4 laboratory science and/or foreign language,
 4 electives

Tests Required: SAT or ACT

High School Transcript: Required

PROFILE OF FRESHMAN CLASS: 1976 SAT SCORES

Math	Verbal	Class Rank in Fifths
700-800 .0%	700-800 .0%	First Fifth 17.4%

GRANTS AND LOANS

SOURCES OF FINANCIAL ASSISTANCE

A PROFILE OF STUDENT AID FOR PENNSYLVANIANS VIA PHEAA

The Pennsylvania Higher Education Assistance Agency (PHEAA) is the administrator of student financial aid programs financed by the General Assembly of the Commonwealth of Pennsylvania. PHEAA was created by the Legislature in 1963 as a student loan guaranty agency, and in 1966 was given legislative authorization to make scholarship awards. These awards now are called grants.

The student and parents are primarily responsible for financing the student's postsecondary education. Grants, combined with loans and student employment, supplement the expected family contribution which can vary depending on earning capacity, number of children enrolled in postsecondary study, and other factors. The practice is for the college financial aid officer to develop a package of grants, loans, and work which, when coupled with the expected contribution from parental income, will usually enable postsecondary schooling costs to be met.

There are two keys to the PHEAA-administered student aid programs: the High School Guidance Counselor and the Financial Aid Officer at the college the student plans to attend. It is through these offices that the student receives career guidance and basic information about financing the costs of postsecondary education. The High School Guidance Counselor and the Financial Aid Officer have knowledge not only about Pennsylvania's programs of financial aid, but also about federal programs and private sources of aid.

Students are encouraged to utilize the services of these offices. They are the most important sources of information about the complex area of financing educational costs.

PHEAA ADMINISTERS THESE PROGRAMS OF STUDENT AID FUNDED BY THE COMMONWEALTH:

The Higher Education Assistance Grant Program. Each year the State Legislature appropriates funds to be awarded as state grants to postsecondary students who are Pennsylvania residents. It is required that the applicant be domiciled in the Commonwealth for one year prior to the date of the applicant's enrollment in higher education and the date of the application for aid in order to qualify for grants. This program is based on the student's need, the condition of which is determined from information supplied by the student and his/her family. Grants do not have to be repaid, and determination of need for state grants is calculated in a standard manner for each applicant.

The Student Loan Guaranty Program is available to both full and part-time students regardless of family income. This program operates with the student obtaining a state loan application from a participating bank, savings and loan association, or credit union. While the student is in school and the loan is under guaranty, the federal government pays the interest on the loan for qualified students (about 95% qualify for federal payment of interest). Nine months after the student leaves school (either by graduation or withdrawal) the student must begin to repay the loan. The borrower may take up to ten years to repay, depending on the total value of loans involved and other factors. In order to assure that lenders make loans available the loan is guaranteed by PHEAA.

The College Work-Study Program is administered by the colleges and provides job opportunities on campus, with non-profit agencies or with governmental employers. This program provides academic year and/or summer employment opportunities intended to assist the needy student in financing educational costs.

SOME INFORMATION ABOUT FEDERAL PROGRAMS

The Congress of the United States supports programs of student assistance administered by the U.S. Office of Education and Pennsylvania's schools, colleges and universities. These include the Basic Educational Opportunity Grant, the Supplemental Educational Opportunity Grant, the College Work-Study, and the National Direct Student Loan Programs.

If you are enrolled or accepted for enrollment in an approved postsecondary institution (college or university, vocational school, technical school, or hospital school of nursing) and are a citizen or permanent resident of the United States, you are eligible to apply for assistance. Remember: Grants are gifts, while loans must be repaid.

BASIC EDUCATIONAL OPPORTUNITY GRANT [BEOG] PROGRAM—makes funds available to eligible students attending approved postsecondary institutions. Get your application from postsecondary school Financial Aid Officers, High School Guidance Counselors, Talent Search, Upward Bound Project, or by writing to P.O. Box 84, Washington, D.C. 20044.

NATIONAL DIRECT STUDENT LOAN (NDSL) PROGRAM—for students who need a loan to help with their educational expenses. Another important source of student aid. You begin repaying nine months after you graduate or leave school for other reasons. You pay interest on the unpaid balance of the loan principal during the repayment period. Financial Aid Officers will know about NDSL and its provisions. Apply through the financial aid office at your postsecondary school.

SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANT (SEOG) PROGRAM—for students of exceptional financial need who, without this grant, would be unable to continue their education. You must be enrolled on at least a half-time basis as an undergraduate or professional student in a participating educational institution. Graduate students are not eligible. If you are selected for SEOG, your educational institution must agree to provide you with additional financial assistance at least equal to the amount of the SEOG grant. Apply through the financial aid office at your postsecondary school.

COLLEGE WORK-STUDY PROGRAM—a supplemental program of aid by which students determined to be in need of financial assistance are given jobs with the expectation that they will return a portion of their earnings towards their costs of education. PHEAA, the participating school or college, and the federal government cooperate in this program. Students work in governmental and other non-profit situations and in many instances ultimately return to these locations after graduation in a career status. Student selection for both campus and off-campus employment is made by the postsecondary school and is based upon demonstrated need for financial aid. Apply through the financial aid office at your postsecondary school.
